

## **Bag Filters**

Global has a large variety of Trade size #2 Bag filters, which are 8" x 30" in size.

From 1 micron to 200 micron we have the size you need for your projects, whether you're running in series or parallel we have the bags to assist your filtration system meet the demands of your media.

These poly felt bag sock filters are great for filtering vegetable oil, motor oil, SVO, WVO, Biodiesel, water, or any liquid down to extremely small micron ratings.

Bag Filters are typically constructed from porous woven or felted fabric. Contaminants larger than the porous openings within the bag filter allow the water to pass through, while trapping the larger contaminant particles.
